

1. Go to the AppsGeyser home page and log in to access your AppsGeyser Dashboard. Select Distribute.

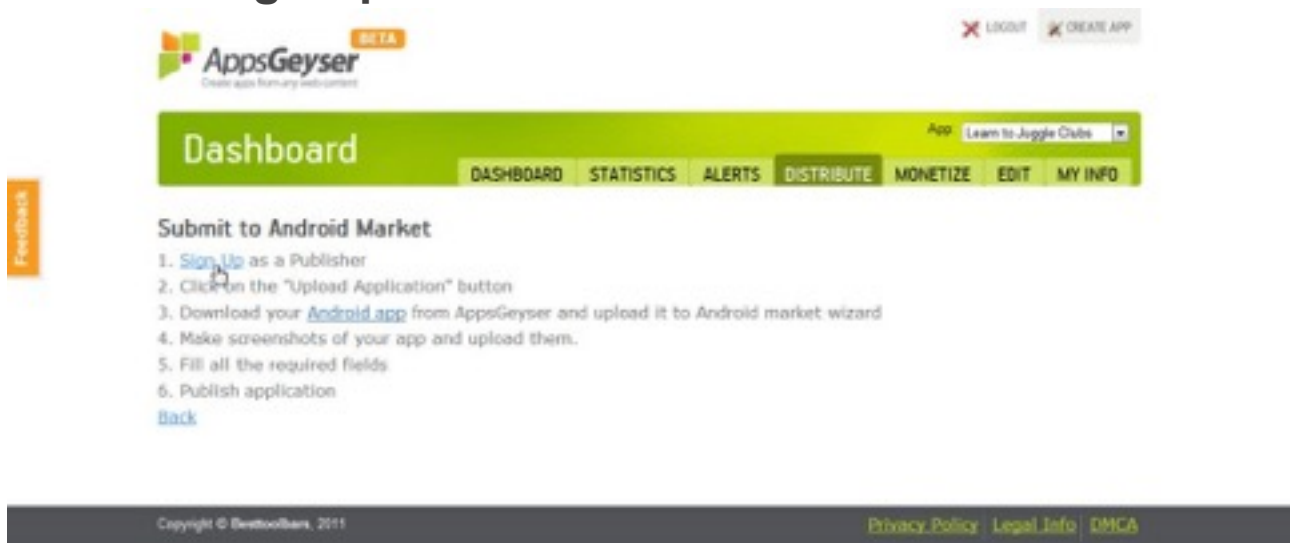

2. Select **Submit to Google Play Store**

3. Save your app's APK to your computer. Be sure to remember where you saved it to.

#### 4. Select **Sign Up** as a Publisher

market.android.com/publish/signup

5. Fill in the relevant information and select **Continue**. This will take you to Google's payment system, Google Wallet. You can pay with any valid credit or debit card.

6. Return to Android Market, read the Android Market Developer Distribution Agreement and select the **I Agree** checkbox.
  7. For this next stage, you'll need to take some screenshots. There are a few ways to do this. If your app is based on web content, you can take screenshots of the web content. If not, you'll need to download an app like **Screen Capture Shortcut** so that you can take a screen capture.
  8. Upload the APK, icon, and screenshots to the Google Play Store. To make everything the right size and format, we recommend **IrfanView**.
  9. Add a description. Look at Section 3: Lecture 8 (Adding an Attractive Description for your App).
  10. Select copy protection. For maximum distribution, we chose to leave it off.
  11. Select content rating. Our app is rated for everyone.
  12. Select pricing. To make it anything other than free, you'll need to set up a merchant account.
  13. Select what countries you want to distribute to. We chose worldwide distribution.
  14. Add your contact information.
  15. Select the consent buttons.
  16. Choose **Publish**
- Congratulations! The app is now in the Google Play Store!
